Subject: Microsoft Settlement: Proposed Final Judgement

Judge,

We are writing today to emlore you to take the Proposed Final Judgement and add some teeth. As the Court of Appeals has affirmed Microsoft had unlawfully and intentionally deceived Java developers and "polluted" the Java standard, we are asking you to restrict their ability to modify Java technologies and add punitive incentives for them to support computer industries standards.

As a small business, we appreciate the free market opportunities that exist here in America, and hope you will keep them firmly in mind as you make this decision.

Respectfully yours,

Barbara Fiegas
